

Everything for your dream home — from construction to comfort

PROBLEM STATEMENT

- Purpose: Show what problem your app solves.

Example Content:

- People face difficulty finding trusted builders, contractors, and material shops nearby.
- Prices vary and there's no single platform for construction + furniture materials.
- Customers worry about data privacy and fake listings.

KEY FEATURES

-  Construction & Building Materials & Furniture with Photos and Prices
- Access contact details of shops, contractors, and builders
-  Nearby Builders and Shops (30 km radius)
-  Secure User Data and Payments
-  Verified Contacts with Phone Numbers
-  Easy-to-use Mobile Interface

ABOUT ONEBUILD

- One-Build is an all-in-one app for house construction, interior furniture, and verified service providers.
- It shows shops and contractors within 30 km based on the user's location
- Ensures data security, safe payments, and verified contacts.

CUSTOMER BENEFITS

HOW IT WORKS

- 1 User logs in (data encrypted)
- 2 App detects nearby services (30 km range)
- 3 Browse materials, furniture, or builders
- 4 Contact via app or call directly
- 5 Purchase securely online or offline

TECHNOLOGY STACK

- Frontend: HTML, CSS, JavaScript
- Backend: Python (Framework Django)
- Database: MySQL / MongoDB
- Security: HTTPS, JWT Authentication
- APIs: Google Maps for location services

DATA SECURITY

- Encrypted personal and payment data.
- No sharing of user information with third parties.
- Regular system updates and secure servers.

TIPS FOR DESIGN

- Use modern templates (blue, grey, or construction theme colors).
- Add images/icons for clarity — houses, materials, maps, etc.
- Keep text short — focus on points, not paragraphs.
- Highlight key features with visuals or infographics.
